Dynamic Product Page

The screenshot shows a code editor interface with a dark theme. The left sidebar contains navigation icons and a tree view of project files. The main area displays a file named `page.tsx` which is part of a component hierarchy starting from `product [id]`. The code implements a dynamic product page with a quantity selector and an "Add to Cart" button.

```
src > app > product > [id] > page.tsx > Page
10  export default function Page({ params }: { params: { id: string } }) {
133    satisfaction in mind. Crafted using premium materials and advanced
134    technology, it offers a perfect balance of functionality,
135    durability, and style. {product.description}
136    <p>/.text-[16px].font-semibold.md:text-[18px].text-[#A9ACC6].leading-[29px].family
137
138    /* Quantity Selector */
139    <div className="flex items-center space-x-4 mt-4">
140      <button
141        onClick={() => setQuantity((prev) => Math.max(prev - 1, 1))}
142        className="px-2 py-1 bg-gray-200 rounded-md"
143      >
144        -
145      </button>/.px-2.py-1.bg-gray-200.rounded-md
146      <span className="text-lg font-semibold">{quantity}</span>
147      <button
148        onClick={() => setQuantity((prev) => prev + 1)}
149        className="px-2 py-1 bg-gray-200 rounded-md"
150      >
151        +
152      </button>/.px-2.py-1.bg-gray-200.rounded-md
153    </div>/.flex.items-center.space-x-4.mt-4
154    <div className="flex flex-col sm:flex-row gap-4 sm:gap-6">
155      /* Add to Cart Button */
156      <button
157        onClick={() => addToCart(product)}
158        className="px-4 items-center py-3 sm:py-4 rounded-md inline-block text-[16px] sm:text-[18px] m
159        >
160          Add to Cart ❤
161      </button>/.px-4.items-center.py-3.sm:py-4.rounded-md.inline-block.text-[16px].sm:text-[18px].md:t
```

The status bar at the bottom shows the current file is `main*`, the line and column are `Ln 69, Col 49`, and the encoding is `UTF-8`. It also includes icons for various tools and services like Prettier, Tabnine, and Go Live.

Dynamic Product Code

The screenshot shows a code editor interface with a dark theme. The top bar includes standard menu items like File, Edit, Selection, View, Go, Run, and tabs for page.tsx, searchbar.tsx, and another page.tsx file.

The Explorer sidebar on the left lists project files under 'FINAL-FIGMA-HACKATHON'. Key files include page.tsx, searchbar.tsx, and various components like myaccount, nofound, shopleftsidebar, shoplist, shoppingcart, signup, fonts, latestproduct, and product/[id].

The main editor area displays a TypeScript component named 'Page'. The code uses Figma-style class names and logic to handle a shopping cart. It includes imports for useState and useEffect from 'react', and a map function over a 'cart' array to render individual item components.

```
10  export default function Page({ params }: { params: { id: string } }) {
11    const [isCartOpen, setIsCartOpen] = useState(false)
12    const [cart, setCart] = useState([])
13
14    const handleAddItem = (item: { name: string; price: number; quantity: number }) => {
15      setCart([...cart, item])
16    }
17
18    const handleRemoveItem = (index: number) => {
19      const updatedCart = [...cart]
20      updatedCart.splice(index, 1)
21      setCart(updatedCart)
22    }
23
24    const handleUpdateQuantity = (index: number, quantity: number) => {
25      const updatedCart = [...cart]
26      updatedCart[index].quantity = quantity
27      setCart(updatedCart)
28    }
29
30    const handleClearCart = () => {
31      setCart([])
32    }
33
34    const handleCheckout = () => {
35      // Logic to handle checkout
36    }
37
38    return (
39      <div>
40        <h1>Your Cart</h1>
41        <table>
42          <thead>
43            <tr>
44              <th>Product</th>
45              <th>Price</th>
46              <th>Quantity</th>
47              <th>Action</th>
48            </tr>
49          </thead>
50          <tbody>
51            {cart.map((item) => (
52              <tr>
53                <td>{item.name}</td>
54                <td>${item.price}</td>
55                <td>{item.quantity}</td>
56                <td>
57                  <button>Remove</button>
58                  <button>Update</button>
59                </td>
60              </tr>
61            ))}
62          </tbody>
63        </table>
64        <button>Proceed to Checkout</button>
65      </div>
66    )
67  }
```

The status bar at the bottom shows the current file is 'page.tsx', line 69, column 49, with 2 spaces, using UTF-8 encoding, and is a TypeScript JSX file. It also displays the date and time as 12:14 AM on 1/22/2025.

Order Completed Component

A screenshot of a web browser displaying an "Order Completed" page. The URL in the address bar is `localhost:3000/completeorder`. The page has a purple header bar with the text `mhhasanul@gmail.com` and `(12345)67890`. On the right side of the header are links for `English`, `USD`, `Login`, `Wishlist`, and a shopping cart icon. Below the header, the main content area features a large blue clock icon. The text **Your Order Is Completed!** is centered below the icon. A message below states: **Thank you for your order! Your order is being processed and will be completed within 3-6 hours. You will receive an email confirmation when your order is completed.** At the bottom, there is a pink button with the text **Continue Shopping**.

Dynamic Routing

The screenshot shows a web browser window displaying a product details page for a chair. The URL in the address bar is `localhost:3000/product/4`, which is highlighted with a yellow box. The page title is "Product Details". The main content features a large image of a wooden chair with blue fabric upholstery. To the left of the main image, there are three smaller thumbnail images: a black tote bag with ".us" on it, a floor lamp, and a small decorative object. On the right side, the product name is displayed in bold: "Stylish Golden Metal Legs Mint Blue Fabric Chair". Below the name is a star rating of 4.5 stars from 22 reviews. The price is listed as \$780, followed by the text "Available in Stock". A descriptive paragraph highlights the product's design focus on quality, innovation, and customer satisfaction. Below the description is a quantity selector with a minus sign, the number 1, and a plus sign. At the bottom are two buttons: "Add to Cart" with a heart icon and "Add to Wishlist" with a heart icon.

Cart Slider Code

The screenshot shows a code editor interface with a dark theme. The left sidebar contains a file tree under 'OPEN EDITORS' and 'FINAL-FIGMA-HACKATHON'. The main editor area displays a file named 'page.tsx' which includes a component for a shopping cart. The component features a slide-in effect for the cart items. The code uses functional programming and JSX for rendering the UI.

```
/* Slide Cart */

className={`fixed top-[35px] right-0 h-[85%] w-72 bg-white shadow-lg transform ${isCartOpen ? "translate-x-0" : "translate-x-full"} transition-transform duration-300`}

<div className="p-4 flex justify-between items-center bg-[#e12570] text-white">
    <h2 className="text-lg font-bold">Your Cart</h2>
    <button onClick={() => setIsCartOpen(false)}>X</button>
  </div>/.p-4.flex.justify-between.items-center.bg-[#e12570].text-white
  <div className="p-4 space-y-4 flex flex-col h-full">
    {cart.length === 0 ? (
      <p className="text-center text-gray-600">Your cart is empty</p>
    ) : (
      <div className="flex-grow space-y-4 overflow-y-auto">
        {cart.map((item, index) => (
          <div key={index} className="flex justify-between items-center border-b pb-2">
            <div>
              <h3 className="text-sm font-bold">{item.name}</h3>
              <p className="text-sm text-gray-500">
                ${item.price} x {item.quantity} = $
                ${item.price * item.quantity}
              </p>/.text-sm.text-gray-500
            </div>
            <Image
              src={item.image}
              alt={item.name}
            </Image>
          </div>
        ))
      </div>
    )}
  </div>

```

The status bar at the bottom shows the file name 'main*', line 'Ln 69', column 'Col 49', spaces 'Spaces: 2', encoding 'UTF-8', and file type 'TypeScript JSX'. It also displays icons for various tools and services like Prettier, Tabnine, and browser tabs.

Login Successfull

A screenshot of a web browser window. The address bar shows the URL `localhost:3000/myaccount`. The main content area displays a modal dialog box with the text "localhost:3000 says" and "Login successful!" followed by an "OK" button. Below the modal, a login form is visible with fields for email and password, and buttons for "Sign In" and "Forgot your password?". The browser's header includes various icons and links, and the footer shows a purple navigation bar with items like "Home", "Pages", "My Account", "English", "USD", "Login", "Wishlist", and a shopping cart icon.

Searchbar Code

The screenshot shows a code editor interface with the following details:

- File Explorer:** On the left, it shows the project structure under "FINAL-FIGMA-HACKATHON". The "src" folder contains components, homepage, and other files like Footer.tsx, Hero.tsx, Navbar.tsx, Topbar.tsx, and searchbar.tsx.
- Open Editors:** Two files are open: "page.tsx" and "searchbar.tsx". "searchbar.tsx" is the active file, indicated by the bolded tab title.
- Code Editor Content:** The code for "searchbar.tsx" is displayed. It defines a "SearchBar" component using React and TypeScript. The component uses the useState hook to manage the search query and the IoSearch icon from react-icons/io5. It includes validation logic to check if the search query is empty and handles user confirmation before performing a search.
- Bottom Bar:** The bottom bar includes various icons for file operations, search, and extensions like Tabnine basic and Prettier.
- Status Bar:** The status bar at the bottom shows the current file is "main*", the line number is "Ln 9", column is "Col 14", spaces are "2", encoding is "UTF-8", and the file type is "TypeScript JSX".

SearchBar Code

The screenshot shows a dark-themed code editor interface with the title "Final-Figma-Hackathon". The left sidebar contains icons for Explorer, Open Editors, Final-Figma-Hackathon, Outline, and Timeline. The "OPEN EDITORS" section lists "page.tsx" and "searchbar.tsx" under the "src" folder. The main editor area displays the "searchbar.tsx" file content:

```
src > components > searchbar.tsx > [?] SearchBar
Edit file using CodeParrot (ctrl+h)
1 import { useState } from "react";
2 import { IoSearch } from "react-icons/io5";
3
4 const SearchBar = () => {
5   const [searchQuery, setSearchQuery] = useState("");
6
7   const handleSearch = () => {
8     if (searchQuery.trim() === "") {
9       alert("Please enter a search term!");
10      return;
11    }
12
13
14
15   const userResponse = window.confirm(`Do you want to search for: "${searchQuery}"?`);
16
17   if (userResponse) {
18
19     console.log("Searching for:", searchQuery);
20     alert(`Searching for: "${searchQuery}"`);
21   }
22
23 };
24
25
26 return (
27   <div className="lg:flex hidden md:block w-[243px] h-[40px] bg-[#fff] rounded-[4px] items-center">
28     /* Input field */
29     <input
```

The code uses React hooks like `useState` and `useEffect` to manage the search query state and handle user input. It also includes a confirmation dialog before performing a search.

Signin Code

The screenshot shows a code editor interface with a dark theme. On the left is the Explorer sidebar, which lists files and folders under 'OPEN EDITORS' and 'FINAL-FIGMA-HACKATHON'. The 'page.tsx' file in the 'myaccount' folder is selected in the Explorer. In the main editor area, three tabs are open: 'page.tsx ...\[id] M', 'page.tsx ...\\myaccount X', and 'searchbar.tsx M'. The 'page.tsx ...\\myaccount' tab is active, displaying the following TypeScript code:

```
src > app > (routes) > myaccount > page.tsx > MyAccount
13  export default function MyAccount() {
70    | Please login using account details below.
71    </p>/.text-center.text-[#9096B2].font-[Lato'].text-[17px].mb-6
72
73    /* Form */
74    <form className="space-y-4" onSubmit={handleLogin}>
75      {error && (
76        <p className="text-red-500 text-sm text-center">{error}</p>
77      )}
78      <div>
79        <input
80          type="email"
81          placeholder="Email Address"
82          value={email}
83          onChange={(e) => setEmail(e.target.value)}
84          className="w-full border border-gray-300 rounded-lg p-3 focus:outline-none focus:ring-2 "
85        />
86      </div>
87      <div>
88        <input
89          type="password"
90          placeholder="Password"
91          value={password}
92          onChange={(e) => setPassword(e.target.value)}
93          className="w-full border border-gray-300 rounded-lg p-3 focus:outline-none focus:ring-2 "
94        />
95      </div>
96      <div className="text-right">
97        <a href="#" className="text-sm text-gray-500 hover:text-pink-500">
98          | Forgot your password?
99        </a>/.text-sm.text-gray-500.hover:text-pink-500
```

The code defines a functional component 'MyAccount' that renders a form with two input fields: email and password. It includes validation logic for the email field and handles password changes. A forgot password link is also provided at the bottom right.

Signup Code

The screenshot shows a dark-themed code editor interface with several open files and a sidebar.

EXPLORER: Shows the project structure:

- OPEN EDITORS:
 - page.tsx ...\[id] M
 - page.tsx ...\[signup] X
 - searchbar.tsx M
- FINAL-FIGMA-HACKATHON (with 2 changes):
 - src
 - app
 - (routes)
 - griddefault
 - page.tsx
 - mainblogpage
 - myaccount
 - nofound
 - shopleftsidebar
 - shoplist
 - shoppingcart
 - page.tsx
 - signup
 - page.tsx
- OUTLINE
- TIMELINE

EDITOR: Displays the content of the file `page.tsx ...\[signup]`:

```
src > app > (routes) > signup > page.tsx > Signup
12  export default function Signup() {
13    /* Main Section */
14    <main className="container mx-auto px-4 flex flex-col items-center">
15      <div className="bg-[#fff] shadow-md rounded-lg p-8 mt-12 max-w-md w-full">
16        <h2 className="text-[32px] family font-bold text-center text-[#000]">
17          Create Account
18        </h2>/.text-[32px].family.font-bold.text-center.text-[#000]
19        <p className="text-center text-[#9096B2] font-['Lato'] text-[17px] mb-6">
20          Please sign up with your details below.
21        </p>/.text-center.text-[#9096B2].font-['Lato'].text-[17px].mb-6
22
23        /* Form */
24        <form className="space-y-4" onSubmit={handleSignup}>
25          {error && (
26            <p className="text-red-500 text-sm text-center">{error}</p>
27          )}
28          <div>
29            <input
30              type="text"
31              name="name"
32              placeholder="Full Name"
33              value={formData.name}
34              onChange={handleChange}
35              className="w-full border border-gray-300 rounded-lg p-3 focus:outline-none focus:ring-2 [&]
36            />
37          </div>
38          <div>
39            <input
40              type="email"
41            />
42          </div>
43        </form>
44      </div>
45    </main>
46  </div>
